EXPERIENCE

Mar 2020 - Present

Team Lead Developer – Lambda, Inc

Lead support to a team of 6 students in the Full Stack Web Development curriculum. Conducted 1:1 code review and helped debug code errors on their projects and sprint challenges

Sept 2019 – July 2020

AP Specialist III – Core Health and Fitness

Processed all AP invoices domestic/international, paid checks to suppliers, account reconciliation, data analysis via Salesforce.com, and data translation of projects via Microsoft Excel

Nov 2014 – June 2018

Staff Accountant – UPM Technology

Created/maintained the AP/AR cashflow data via Microsoft Excel and built a macro to run a scheduled time to produce management reports (saved time to increase productivity)

PROJECTS

John Conway's Game of Life

<https://cs-bw-game-of-life.vercel.app/>

A computer science classic from 1970, a program that simulates a cellular automaton.

Built with: HTML, CSS, JavaScript, React, Python

DJ's Library of Books

<https://djzlibrary.netlify.app/>

A simple, yet functional web application where a user can add and delete books from a local storage. Application built straight vanilla JavaScript, simple local storage with no frameworks.

Built with: HTML, CSS, JavaScript

jotDown!

<https://jotdownapp.netlify.app/>

To-Do list, where a user can add items, delete items, and even cross off items one-by-one, then delete all at once.

Built with: HTML, CSS, bootstrap4, JavaScript, React
